

Why is Teamker the best?

Imagine yourself running yet another round of CS3216.

After weeks of intense selection and filtering to pick only the best students, all you want is for them to make the coolest shit.

However, so much admin work still needs to be done.

From printing out the superhero worksheet and wasting an hour to allow the students to mingle and ask each other questions, all these still do not ensure that the students find their best match for the final projects.

As a result, assignments one to three have to be sacrificed for students to try out their potential team mates.

Now imagine yourself as a student.

You've worked really hard for that cap 5.0, you've done so many things outside of school and labored tirelessly for that \$500 per month internship at the pre-seed start up that really squeezed you dry, although you did learn a lot through googling.

Now you're in that legendary module ready to create your own unicorn to earn a billion dollars in shares.

However, you don't know a single soul in the module.

Before you can even begin doing anything, you have to make an effort to talk to everyone in the module and find that person that best complements your skillset.

“Do you know photoshop? Have you done marketing before?”

The designers and business people are quickly snatched up by the fast askers and now you are left with four back end coders for your assignment 1.

We at Teamker
believe that we can
do better.

We believe that everyone's lives can be improved in less than **5 steps**.

For the **group administrator**, all you have to do is head over to teamker.tk and sign your facebook group up with a few steps.

1. Log into facebook by using the "Continue using Facebook" Login button
2. Select the group you intend to sign up with Teamker
3. Choose certain attributes you want to use to match the students with. (eg. Design, Coding, Business) At least 3 attributes are required for the most accurate matching
4. Select if you want matches to be as similar as possible or as different as possible.
5. You're done! To check the progress of your group, simply click the group you signed up with Teamker

For the **students**, it's even simpler:

1. Simply select the group that you intend to find a teammate for
2. Answer all the questions and submit the survey
3. See the results of your matching by clicking the group again and quickly contact your best match before he or she gets stolen by another team!
